A PLAYGROUND AND CLUB.

Suggested Adjuncts to Local Educational System.

Recommendations Made by Principal Rordan, of the Vacation School—Commissioners to Ask for Appropriation to Carry Out Ideas.

A public playground, and a general clubhouse to be erected therewith, to be established in the city of Washington, are the subjects of a recommendation made by Raymond Rordan to the Board of Education and the District Commissioners. Mr. Rordan is principal of the Greenleaf vacation school, and this recommendation accompanies his report to the Board of Education, concerning the summer branch of the public school system, for which he is almost entirely responsible as the originator.

A detailed plan, with drawings of the playground and clubhouse, with an expression of his views concerning the place it is intended to fill in the educational needs of the city, is Mr. Rordan's recommendation. The idea was forwarded to the Board of Education with the recommendation. The grounds and clubhouse proposed are suggested as but the first of many which are expected to be established in various parts of the city, should the experiment if adopted prove a success. He estimates that the expense of fixing up the playground would amount to \$7,000, and added to this is the expense of erecting and fitting up the clubhouse, estimated at \$2,000. A total for both of \$14,000.

The committee on Special Instruction and Industrial Education of the Board of Education has considered the plan, and it has received their endorsement, and, in consequence, the endorsement of the entire Board of Education. Further than this, the plan has been forwarded to the District Commissioners, and has been very favorably received by them, and, in consequence, the endorsement of the entire Board of Education. playground and the clubhouse recommended by Mr. Rordan.

The Southwest is suggested by the originator of the plan, as the most desirable section of the city in which to introduce the first public playground. The lot which it is proposed to select for the purpose is half of the square located between M and N Streets, Sixth and Seventh Streets southwest. This property is at present leased to a parking lot, and is used for the storage of bricks, curbing, etc. It is 300 feet on Seventh, 350 feet on M, 300 feet on Sixth, and 225 feet on N Street side. Around the outside of the fence is a parking twelve feet wide.

The grounds are to have a baseball field, sand courts, a bowling alley, tennis courts, shuffleboard, workshop, croquet courts, swings, seesaws, and quail courts. There is to be a clubhouse, a vegetable garden, toilet rooms and bath, and athletic outfit. A path will be used for roller skating, and another entirely for racing and running. A small building will be used for an office and reception room. Stands and shelters will be distributed about the place, and there will be also a large pavilion. The grounds will be enclosed.

The clubhouse is to be equipped with a most approved gymnasium, a poolroom, a reading room, rooms for men and for women, toilet rooms, baths, a sick room, a sewing room, a kitchen, a janitor's living room, and a room for the use of the grounds. The grounds and clubhouse proposed are suggested as but the first of many which are expected to be established in various parts of the city, should the experiment if adopted prove a success. lar games at stated periods, rather than let the arrangement be haphazard, and thus risking the chance of the rather than the many getting opportunities to play. The field would be kept in perfect condition under supervision by the teams in turn.

"Pennant winning, word of course, be the object of the game, but the real object is to get the children to work, and to be working at the same without interference."

Suggestions for the limitations of the use of the playground are made as follows: "Limit the use of the playground to the Southwest. Prove the value of such an establishment here, then place similar ones elsewhere."

"All need register at the office on the grounds. The building is to be a simple structure, a button containing a number of the pupils here stop school at the grounds. This button is to be placed in the hands of the pupils here stop school at the grounds. This button is to be placed in the hands of the pupils here stop school at the grounds."

"The general character of the playground should be that of a winter resort. Describing the character of the building to be selected for the purpose, the recommendation continues: "The building is to be a simple structure, a button containing a number of the pupils here stop school at the grounds. Other leagues would be organized for play of all competitive games.

"The players in any one league, as a general thing, will not be placed in other leagues, but an exception will be made in the case of a team which is so good that it will have ample opportunity to utilize the advantages of the playground as arranged by plan, nearly all leagues could be working at the same without interference."

MOTOR VEHICLE LITIGATION.

Judge Kohlsaat Appoints a Receiver for a Chicago Company.

CHICAGO, Sept. 28.—Acting on the request of C. J. Friedman, one of its largest stockholders, Judge Kohlsaat has appointed Max H. Whitney receiver of the Woods Motor Vehicle Company. Subsequent to this action yesterday nineteen creditors of the company sought to obtain from the referee in bankruptcy, Mr. Wean, an order appointing Joshua Windsor receiver, pending the settlement of bankruptcy proceedings.

When Attorney Ben V. Baker had informed Mr. Wean of the action of Judge Kohlsaat the master in bankruptcy denied the petition. Mr. Whitney qualified promptly by giving \$100,000 bond. While the stockholders of the company are asking for a receiver it is said to be with the intention of reorganizing. "The business is solvent and there is no reason why it should not continue," said Attorney Smith.

The concern's assets are \$250,000 and the liabilities less than \$125,000.
